Case 3

THE EVERGREEN MASCOT: DRIVING LONG-TERM BUSINESS GROWTH WITH 'STUDI'

BACKGROUND

The study-abroad market in Bangladesh faces intense competition, with consultancies constantly vying for student attention across digital platforms, forums, and offline channels. However, relying solely on short-term advertising creates rising customer acquisition costs (CAC) and inconsistent brand equity. Rather than using campaign-based promotional pushes that fade over time, StudyIn needs an enduring brand asset—a central figure that systematically scales marketing efforts, builds long-term trust, and drives sustainable business growth over years, not just weeks.

The Situation

StudyIn is introducing its permanent official mascot, 'STUDI'—the long-term face, voice, and operational guide of the company. Unlike temporary campaign themes, STUDI will be built directly into the fabric of StudyIn's business operations, marketing funnel, and customer service experience. StudyIn has allocated a budget of BDT 10 lakh to fund the visual asset creation, tech integration, physical suit production, and initial channel rollouts that will power STUDI as a multi-year growth driver.

The Challenge

You are the Growth Strategy & Brand Team for StudyIn Bangladesh. Design an operational and marketing framework that leverages STUDI as a permanent engine for business growth. Your strategy must explain how STUDI will continuously lower customer acquisition costs, increase lead-to-counseling conversion rates, and build scalable brand equity across every student touchpoint.

Total Case Budget: BDT 10 Lakh (Design, asset production, tech/chatbot UI integration, physical costume, and initial activation)

Required Deliverables

- **Long-Term Brand Positioning & Mascot Architecture:** Define STUDI's brand identity, persona, voice, core values, and long-term role across StudyIn's physical and digital properties.
- **Continuous Content & Community Strategy:** Develop evergreen content frameworks (such as recurring 'STUDI Explains' video series, monthly immigration/visa updates, and interactive community Q&As) that keep prospective students engaged throughout a 6–18 month decision cycle.
- **Funnel Integration & Operational Use:** Detail how STUDI will be embedded into daily operations, including website navigation, automated WhatsApp customer support, counseling intake tools, pre-departure orientation, and post-visa onboarding.
- **Growth & Business Impact Strategy:** Explain how STUDI will drive long-term business performance—specifically addressing reductions in advertising expenditure (CAC), improvements in brand recall, and higher customer referral rates.
- **BDT 10 Lakh Implementation Budget:** Provide a tactical breakdown of the BDT 10 lakh budget, balancing visual asset creation, tech integration (chatbot/UI), physical suit production, and initial channel rollouts.
- **Long-Term Measurement Framework:** Define year-over-year metrics to track success, including Customer Acquisition Cost (CAC) reduction, organic referral rate, counseling conversion rate, and brand retention.

Core Question

How can StudyIn transform STUDI from a simple visual mascot into a high-performing, scalable business asset that drives continuous revenue growth and long-term market leadership in Bangladesh?
